Career Prospects:

Variable depending on the economy and market conditions. Jobs are often in areas such as: mental health settings (including community), non-profit organizations, inpatient hospital and community health units. As with many social work jobs they usually start as contract positions.

FAQ's:

When do I declare my field of study?

Year 1 of 2-year MSW Program: Submit your form to the Registrar, normally at the beginning of February <http://socialwork.utoronto.ca/current-students/forms/>

Advanced Standing MSW Program: Indicate field of study when applying for admission to the program.

Who do I contact for advice on field of study selection?

Your faculty advisor. Advisors are assigned to students by the Associate Dean, Academic's Office. Notification is by e-mail at the start of September. If you do not know who your advisor is, e-mail Natasha Valentine n.valentine@utoronto.ca

Can I take one of the selective courses I am not counting toward my core requirements as one of my electives?

As long as you have enough courses to complete the field of study requirements, you can take one of the "selective" options to count as an elective. For example, if you are focusing on Mental Health, you could choose to take SWK4604H and SWK4631H as your core courses and then enroll in SWK4622H (health) as an elective.

Can I take core courses offered in other fields of study to count as my electives?

Students have the option of taking a course from another field of study to count as an elective if there is room in the course after students in the field have enrolled. Check with the Faculty Registrar sharon.bewell@utoronto.ca to see whether there is space in another course prior to the start of the term the course is offered. Typically, we will know if there is room in a course by the end of July for Fall Session courses and by the end of November for January Session courses.

What competencies can I expect to gain from this field of study?

Students in Mental Health and Health can expect to gain the knowledge necessary to perform as an inter-professional health team member in helping individuals and families adapt to and overcome challenges associated with mental and physical illness. Students will leave the program with understanding of the social and community context in which illnesses occur and are exacerbated, as well as an understanding of the policies that facilitate the creation of these social environments. This knowledge equips students with the critical thinking capacities to intervene at multiple levels (individual, family, group, community, policy) to support those with various needs and abilities.
